JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

led *Papillares* ; but that from the tip of the Tongue unto the string there is observed none at all.

2. He hath experimented, that if you put *Sal Armoniack* upon the places of the Tongue, where those *Eminencies* are not, you shall find no Taste ; but that you will find it presently, as soon you put any such Salt, where they are to be met with. Ergo, saith he, those *Eminencies* are the principal Organ of Taste.

3. He assures, that with a *Microscope* may be seen in those *Risings* many little holes, at the bottom whereof there are small nerves, terminating there : But he directs, to observe this in live and healthy, not in dead or sick Animals.

Having laid down these Observations, he concludes, that the manner, after which Taste is perform'd, is this, That the particles of Salt passing through those pores, which pierce the *Papillary Eminences*, and penetrating as far as to the nerves, that meet them there, do by the means of their small points prick them ; which pricking is called the *Taste*.

In the mean time he acknowledges, that before him Signior *Malpighi*, Professor at *Messina*, had made some of these discoveries.

The notice of these two last Books we owe to the *French Journal*.

Correct in Numb. 19.

Pag. 342. lin. 33. read *mist Orts* in stead of, *mist with Orts*.

Correct in this present Numb. 20.

Page 359. line 13. Read *Marle* for *Pearle*.

London, Printed for *Moses Pitt* at the *White-Hart* in *Little-Britain*.
